

March 23, 2026

Dear Valued Customer,

Recent global events have caused unprecedented increases in fuel costs. These costs are putting the entire transportation system in turmoil which in the worst case could cause truckers to have to decline work to avoid financial loss.

To provide our customers with the quality service and timely deliveries that they have come to expect, we will be instituting a fuel surcharge for all deliveries beginning on March 23, 2026. Fuel prices will be based on the Department of Energy Midwest PADD2 pricing for On-Highway diesel fuel posted on the Monday of the week prior to aggregate delivery. The specific fuel surcharge percentage will be charged per the attached rate schedule.

For clarification by example: The fuel price on Monday, March 23, 2026, will determine the fuel surcharge for the week of March 23-28, 2026

This fuel surcharge will apply to all deliveries by 90 West Logistics for the following entities, Beverly Materials, 90 West Logistics, Waveland Logistics and Green Soils Management to name a few.

Our intent is for this notice to assist you in submitting future pricing for jobs coming to bid. 90 West Logistics will maintain our commitment to quality and service, and we greatly appreciate your continued business and cooperation. If you have any questions about the surcharge or pricing on current jobs, please don't hesitate to contact us at 847-560-1100.

Sincerely,

90 West Logistics.
